Skill Highlights

- Stock management System
- E-commerce platform
- Frontend web development
- Creative design
- Innovative
- Service-focused

Experience

GigaByte Limited, North Cyprus (09/2018 to 05/2022)

- **E-commerce Web Designer and Front-End Developer**: I prepared e-commerce sites using the Nopcommerce open-source e-commerce platform. I did content management and design. I was also managing client websites. I edited the product images and detail descriptions.
- **Data Center Support**: I worked in datumcenter desktop services to support customers in the management. Using Whmcs Payment panel, Plesk and Solid CP Management Panels, MailEnable e-mail management systems, I provided support to customers for services such as domain name registration, e-mail management, web hosting, software virtualization and virtual server rental.
- **Stock Tracking System:** I was making stock grouping operations, Stock Receipts, Current Accounts, Collecting Revenues, Payment, Invoice, Refund, Waybill and Ordering in Softwaremen Suit Application. I made purchase-sale-expense invoice, purchase or sale voucher, inventory receipt, warehouse transfer receipt, counting, trading return transactions. While dealing with this job, I had the chance to examine the resource planning applications in detail.

Education

Computer Programming: **Ondokuz Mayıs University** –2014
Computer Engineering: **Cyprus International University** –2018
